

# Co Cars

# Co Bikes

## Mission:

Electric and low-emission car and bike share for local people

## What they do:

**Co-Cars** is a car club based in Exeter that provides low carbon, on demand, affordable shared mobility. Members use an app to manage the booking of electric and low-emission cars – from as little as half an hour to several days – Pick up and dropping off at one of two central spots in Salisbury.

Sustainable car use with none of the headaches of private car ownership!

**Co-Bikes** is part of Co-Cars and started with just 20 bikes at six locations in 2016 – it was Britain's very first on-street electric bike hire scheme. There are now bikes in many other locations, including Salisbury. You can hire one of their electrically assisted bikes from Salisbury by registering on the [nextbike app](#) – a fun, easy, affordable, and non-sweaty way to make work and leisure trips.
